

Supplementary Fig. S3. prostate-specific membrane antigen (PSMA) expression in hepatic metastasis compared to hepatocellular carcinoma (HCC). (A–D) PSMA expression in HCC vs. hepatic metastasis. (A) All hepatic metastasis. (B) Grouped by treatment status. (C) Grouped by metastasis timing. (D) Grouped by combination of metastasis timing and treatment status (concurrent and untreated vs. metachronous and/or treated). p-values were calculated using Mann-Whitney U.
