

Supplementary Table S6. Comparison of survival outcomes for ANXA2 and hPG expression levels in the primary tumors (T) and the lymph node metastases (LN)

	H-score <100	H-score ≥100	p-value
ANXA2 (T) median overall survival	75.443	29.115	.051
ANXA2 (LN) median overall survival	43.082	19.213	.016
ANXA2 (T) median disease-free survival	42.951	15.574	.035
ANXA2 (LN) median disease-free survival	30.295	8.951	.029
hPG (T) median overall survival	44.066	41.836	.48
hPG (LN) median overall survival	28.721	45.049	.44
hPG (T) median disease-free survival	34.115	31.459	.63
hPG (LN) median disease-free survival	17.836	16.230	.74

hPG, progastrin; ANXA2, annexin A2.
